MONTHLY REVIEW OF BUSINESS STATISTICS

Vol. XXI

OTTAWA, MAY, 1946

No. 5

DOMINION STATISTICIAN: HERBERT MARSHALL, B.A., F.S.S.
CHIEF, BUSINESS STATISTICS BRANCH: SYDNEY B. SMITH, M.A.

ECONOMIC CONDITIONS IN APRIL

Six factors indicating the trend of economic conditions were nearly maintained in April compared with the preceding month. The index of the physical volume of business showed further increase following the considerable advance in March over the low point of the second month of the year. The index of common stock prices and the number of industrial shares traded on the exchanges were greater, the index of common stocks reaching a new high position for recent years. Advance was also shown in wholesale prices, while Dominion bond prices receded from the maximum reached in March. Despite the increase in notice deposits and Provincial balances the sum of the four main classes of deposits with the chartered banks declined from \$5,830 million to \$5,781 million.

The three charts appearing in this issue are shown on pages 4, 6 and 8. The first chart is designed to show the annual fluctuations in six important economic factors from 1919 to 1945. The first section compares the relative movements of employment and wholesale prices. Placed on the base of 1935-39, wholesale prices occupied a higher position during the first decade, while employment reached higher levels from 1939 to the present. Wholesale prices in 1945 were higher than at any time since 1921. The trend of common stock and bond prices is shown in the second section of the chart. Common stock prices occupied higher territory from 1926 to 1931 and during 1936 and 1937. Bond prices were relatively higher from 1938 to 1945. The important increase in money supply and cheques cashed from the outbreak of hostilities to the present time is shown in the third section. A higher position of money supply does not necessarily mean a reduction in turnover, as bank notes played a more important role during recent years than in the pre-war period in the meeting of financial obligations. The production of metals and non-metallic minerals is outlined in charts two and three.

Production:

Production, aside from the reaction in February, was relatively well maintained during the first four months of the year. A downward trend had been recorded from the beginning of 1944 until the end of last year. While the level of productive operations in March and April was somewhat below that of January there are indications that resistance is now being exerted against further decline.

Seeding of wheat and other grains made satisfactory progress during May. Growth was retarded owing to cold weather and the need of greater precipitation was widespread. Marketings of wheat in Western Canada were at lower levels during the period from August 1 to May 9. The total was 205 million bushels against 288 million during the same period one year before. These figures are exclusive of Durum wheat. The visible supply of Canadian wheat was less than one-quarter that of the same date of 1945. The stock was 76 million bushels against 311 million.

The sale of live-stock on stockyards dropped to a lower level in April. The decline in cattle sales was much greater than normal for the season. Minor increase was recorded in the sale of hogs. The index of storage holdings was 122.7 at the first of April against 106.9 one month before. The position at the first of April was slightly above that of January, due allowance being made for seasonal tendencies.

1935-39=

100

240 ———

MAJOR ECONOMIC FACTORS

1919-1945

Forestry:

The expansion in the operations of the newsprint industry continued in April. A new maximum was reached with the output of 337,862 tons. The increase, however, was somewhat less than normal for the season. The export of planks and boards was 141 million feet against 151 million in the preceding month. Increases were shown in the outward shipments of woodpulp and shingles. The shipments from Canadian mills during the month were 348,103 tons, showing a marked gain over April of last year. Timber scaled in British Columbia during April was 291.4 million feet compared with 253.6 in the preceding month. The increase was practically equivalent to seasonal variation. Newspaper advertising linage in Canadian dailies continued to show an increasing trend which became apparent early this year. The gains were 8.5 per cent over the same month last year and 27 per cent over pre-war March 1938. During the first quarter the gain was 12.3 per cent over the same period of 1945.

The factors indicating the trend of manufacturing production were uneven in April as compared with the preceding month. The flour milling industry showed recession after seasonal adjustment during the latest month for which statistics are available. The manufacture of sugar dropped to a low point in the fourth four-week period of the year. The output of the dairy industry showed marked expansion even after adjustment for seasonal tendencies. The index moved up about 50 points to 180.5. The output of creamery butter was 19.6 million pounds against 11.8 million in the preceding month, while the output of factory cheese rose from 2.5 million pounds to 6.8 million.

The operations of the cotton textile industry showed recession in April, the raw cotton used having dropped from 15.1 million pounds to 13.9 million. A majority of the factors indicating the trend of operations in the secondary iron and steel industry reached lower levels in the latest available month.

The revenue freight car loadings for the period from the first of the year to May 11 were 1,258,425, showing a slight increase over the same period of last year. Grain and grain products showed considerable decline, but building materials, woodpulp and paper were moved in greater volume. The gross earnings of the Canadian Pacific Railway from the beginning of the year to May 14 were \$103.9 million, showing a reduction from \$111.6 million for the same period of 1945.

Consumption of gasoline in Canada during 1945 amounted to 29.5 million barrels of 35 imperial gallons each, compared with 28.5 million barrels in the preceding year. Increases were shown in the central provinces and British Columbia.

Freight traffic through the Canadian and United States locks of the Sault Ste. Marie canals showed decline compared with April 1945. The first vessel passed through the Canadian locks April 8, six days later than last year. The United States locks opened March 25. Declines were shown in the movement of grain and iron on the downward trip, while up-bound, soft coal also showed a marked reduction.

It was announced that the "double depreciation plan" in assisting industries in reconversion projects had been extended to March 31, 1948. The object of the extension was to remove the possibility that industrial projects would be rushed forward to qualify for the double depreciation privilege to the disadvantage of the extensive housing construction now in progress.

Construction:

The prosperity of Canada, as of other countries, depends upon the magnitude of expenditures of different classes. The chief forms affecting employment and income are for the provision of plant and equipment and other classes of capital formation, the expenditures of people in other countries for Canadian exports and the disbursements of the Dominion Government.

Contracts awarded during the first four months of the present year amounted to no less than \$194 million, considerably more than twice the amount booked

PRODUCTION OF METALS

during the same period of 1945. Awards for the first four months were greater than in any similar period on record. Each of the main classes of construction recorded an advance over the preceding year. It is estimated that 300,000 housing units will be required to relieve Canada's present housing shortage. The needs for the period ending 1950 will be about 400,000 units. Nearly 47,000 relief units were built in Canada during last year by new construction and the conversion of existing buildings. New dwellings made up about 41,000 of the total.

The primary iron and steel industry made an excellent showing in the early months of the present year despite the elimination of war demands. The production of steel ingots and castings was only 8.7 per cent less than in the first quarter of 1945, while pig iron produced showed a decline of 5.6 per cent.

Trade:

The expansion in the distribution of commodities through retail outlets was continued during the early months of the present year, even after adjustment for seasonal tendencies and retail prices. The index of sales rose from 212.6 in February to 229.3 in March. Progressive advances were also shown in wholesale sales after the usual adjustments.

The lower levels of external trade in comparison with last year is due to the discontinuance of the outward shipments of war supplies. First quarter shipments from Canada this year reflect the transition from war time to a partial peace time basis. Some interesting changes are revealed, especially the marked increase in exports to Latin America, a market which still has enormous possibilities for Canadian products. During the first quarter shipments were about $2\frac{1}{2}$ times greater than during the same period of 1945. The effect of relief shipments can be clearly seen as well as the wide drop resulting from cessation of the war. The distribution of the export trade to different countries, showed marked changes for example, the 94.1 per cent drop in shipments to Italy and the 81 per cent decline in the volume to Egypt. Sharply increased exports were made to France, Belgium, The Netherlands and Norway, during March last. Canada's economic well-being depends to a considerable degree upon conditions abroad which will enable her to market the products of her factories and farms.

Finance:

Dominion ordinary expenditures rose from \$25.9 million in April 1945 to \$45.4 million this year. Most of the increase came from payments on family allowances of \$19.9 million last month, while there were no corresponding disbursements a year ago. Demobilization and reconversion expenditures dropped from \$136.1 million a year ago to \$76.5 last month. The figures include a \$10 million grant by the Mutual Aid Board with no corresponding disbursements listed for the recent period. The grand total expenditures last month were \$122 million against \$162 million one year ago.

The cost of living index in Canada at April 1, was higher than at any time during the war. The index advanced from 120.1 on March 1 to 120.8. The index slightly exceeded the wartime high level of 120.5 recorded in August, 1945. The principal influence in the increase came from the food group which rose 2 points to 135.1.

Savings on deposit in Canadian chartered banks on March 31, were at a new maximum of \$3,170 million. This represented an increase of \$92.2 million over the preceding month and compared with \$2,725 for the corresponding day of last year. The combined notice and demand deposits also showed advances over the preceding month and over the same month of 1945. The purchase of securities continued during the latest month for which statistics are available. The total on March 31 was \$4,197 compared with \$3,606 million on the same date last year.

PRODUCTION OF NON-METALLIC MINERALS 1919-1945

REVUE MENSUELLE DE LA SITUATION ÉCONOMIQUE

VOL. XXI

OTTAWA, MAI 1946

N° 5

STATISTICIEN DU DOMINION: HERBERT MARSHALL, B.A., F.S.S.
CHEF, BRANCHE DES STATISTIQUES ÉCONOMIQUES: SYDNEY B. SMITH, M.A.

SITUATION ÉCONOMIQUE EN AVRIL

Six facteurs qui indiquent la tendance de la situation économique demeurent presque stationnaires en avril en comparaison du mois précédent. L'indice du volume physique des affaires accuse une nouvelle augmentation, à la suite de la hausse considérable en mars par rapport au bas niveau du deuxième mois de l'année. L'indice du cours des actions ordinaires et le nombre d'actions industrielles négociées à la Bourse sont plus élevés; l'indice du cours des actions ordinaires touche un sommet inconnu depuis plusieurs années. Les prix de gros manifestent de même une augmentation, tandis que le cours des obligations du Dominion décline comparativement au maximum touché en mars. En dépit de la hausse des dépôts à terme et des soldes provinciales, la somme des quatre catégories principales de dépôts dans les banques à charte diminue de \$5,830 millions à \$5,781 millions.

Les trois tableaux de la présente publication sont aux pages 4, 6 et 8. Le premier indique les fluctuations annuelles de six facteurs économiques importants de 1919 à 1945. La première partie compare les mouvements relatifs de l'emploi et des prix de gros. Etablis sur la base de 1935-39, les prix de gros occupent un niveau plus élevé durant la première décennie, tandis que l'emploi atteint des niveaux plus élevés de 1939 à nos jours. Les prix de gros en 1945 sont plus élevés qu'à tout autre temps depuis 1921. La tendance du cours des actions et des obligations ordinaires est expliquée dans la deuxième partie du tableau. Le cours des actions ordinaires est à la hausse de 1938 à 1945. L'augmentation importante de fonds d'argent et de chèques encaissés à compter du début de la guerre à nos jours est indiquée à la troisième partie. Un niveau plus élevé de fonds d'argent n'amène pas nécessairement une réduction du chiffre d'affaires, parce que les billets de banque ont joué un rôle plus important au cours des récentes années dans le défraiement des engagements financiers. Les graphiques deux et trois décrivent la production métallique et métalloïdique.

Production:

La production, en excluant la réaction de février, se maintient relativement bien durant les quatre premiers mois de l'année courante. Une tendance décroissante se fait sentir du début de 1944 à la fin de l'année dernière. Bien que le niveau des opérations productives en mars et en avril soit quelque peu au-dessous de celui de janvier, il y a maintenant des signes de résistance à de nouveaux déclin.

Les semailles de blé et d'autres grains progressent de façon satisfaisante en mai. Le froid retarde la végétation et il y a un besoin général de pluie. Les ventes de blé dans l'Ouest canadien occupent des niveaux inférieurs durant la période du 1er août au 9 mai; le total est de 205 millions de boisseaux contre 288 millions de boisseaux la même période il y a un an. Ces chiffres n'embrassent pas le blé Durham. Les stocks visibles de blé canadien sont de moins d'un quart de ceux de la même date en 1945, soit de 76 millions de boisseaux contre 311 millions de boisseaux.

La vente de bestiaux dans les parcs à bestiaux diminue en avril. Le déclin est beaucoup plus marqué que normalement pour la saison. Les ventes de porcs augmentent légèrement. L'indice des stocks en entrepôt est de 122.7 le 1er avril auprès de 106.9 il y a un mois. La situation le 1er avril est quelque peu supérieure à celle de janvier, compte tenu des tendances saisonnières.

Industries forestières:

L'expansion des opérations de l'industrie du papier à journal persiste en avril. La production de 337,862 tonnes atteint un nouveau maximum. L'augmentation, toutefois, est quelque peu inférieure à la normale pour la saison. Les exportations de planches et de madriers atteignent 141 millions de pieds contre 151 millions de pieds le mois précédent. Les expéditions à l'étranger de pulpe de bois et de bardeaux augmentent. Les expéditions par les scieries canadiennes durant le mois sont de 348,103 tonnes, soit un gain remarquable par rapport à avril l'an dernier. Le bois mesuré en Colombie Britannique en mars est de 253.6 millions de pieds, en comparaison de 198.5 millions de pieds le mois précédent. Cette augmentation est à peu près équivalente à la variation saisonnière. Le nombre de lignes de publicité dans les quotidiens canadiens continue de manifester la tendance vers la hausse qui existait depuis les débuts de l'année courante. Les gains sont de 8.5 p.c. par rapport au même mois l'an dernier et de 27 p.c. de plus que ceux de mars 1938. Au cours du premier trimestre, le gain est de 12.3 p.c. sur la même période en 1945.

Les facteurs qui indiquent la tendance de la production manufacturière sont inégaux en avril par rapport au mois précédent. La minoterie accuse une baisse après ajustement saisonnier durant le dernier mois statistique. La production de sucre diminue à un bas niveau la quatrième période trimestrielle. La production de l'industrie laitière augmente considérablement, même après ajustement saisonnier. L'indice augmente d'environ 50 points pour atteindre 180.5. La production de beurre de crèmerie est de 19.6 millions de livres contre 11.8 millions de livres le mois précédent, tandis que la production de fromage de fabrique passe de 2.5 millions de livres à 6.8 millions de livres.

Les opérations de l'industrie textile de coton déclinent en avril; le coton utilisé baisse de 15.1 millions de livres à 13.9 millions de livres. Une majorité de facteurs qui indiquent la tendance des opérations de l'industrie du fer et de l'acier secondaires atteignent des niveaux moins élevés durant le dernier mois statistique.

Les chargements de wagons de marchandises payantes durant la période du 1er janvier au 11 mai sont de 1,258,425, soit une légère augmentation auprès de la même période l'an dernier. Le grain et les produits du grain déclinent considérablement, mais les matériaux de construction, la pulpe de bois et le papier sont transportés en plus grandes quantités. Les recettes brutes du Pacifique canadien du début de l'année au 14 mai sont de \$103.9 millions, soit une diminution comparativement à celles de \$111.6 millions gagnés durant la même période de 1945.

La consommation d'essence au Canada durant 1945 s'élève à 29.5 millions de barils de 35 gallons impériaux chacun, en comparaison de 28.5 millions de barils l'année précédente. Les provinces centrales et la Colombie Britannique enregistrent des augmentations.

Le trafic des marchandises passant par les écluses canadiennes et américaines du canal du Sault-Ste-Marie décline par rapport à avril 1945. Le premier navire a passé par les écluses canadiennes le 8 avril, six jours plus tard que l'an dernier. Les écluses américaines ont été ouvertes le 25 mars. Le mouvement en aval de grain et de fer diminue; le mouvement en amont de charbon mou décline aussi considérablement.

Il est annoncé que le programme de double dépréciation destiné à aider les industries dans leurs projets de convertissement a été prorogé jusqu'au 31 mars 1948. Le but de cette prorogation est d'éliminer la possibilité que les projets des industries soient accélérés en vue de bénéficier du privilège de la double dépréciation, au détriment du programme étendu de construction de logements présentement mis en œuvre.

Dépenses:

La prospérité du Canada, comme celle des autres pays, repose sur l'étendue des dépenses de différentes catégories. Les principales catégories qui influent

sur l'emploiement et le revenu sont la formation de capitaux, comme par exemple la construction d'usines et l'achat d'outillage, les dépenses de personnes dans d'autres pays pour les exportations canadiennes et les déboursés du Gouvernement du Dominion.

Les contrats adjugés durant les quatre premiers mois de l'année actuelle s'élèvent à pas moins de \$194 millions, soit beaucoup plus que double du montant adjugé durant la même période de 1945. Les adjudications pour les quatre premiers mois sont plus élevées qu'en toute autre période semblable. Chacune des principales catégories de construction enregistre une augmentation par rapport à l'an dernier. Il est estimé qu'il faudra 300,000 unités de logement pour combattre avec succès la présente pénurie de logements au Canada. Les besoins de la période se terminant en 1950 seront d'environ 400,000 unités. Près de 47,000 unités d'urgence se sont construites au Canada l'année dernière au moyen de nouvelles constructions et de conversions de maisons déjà existantes. Les logements nouveaux forment environ 41,000 du chiffre global.

L'industrie primaire du fer et de l'acier fait excellente figure au cours des premiers mois de cette année malgré l'absence des exigences de guerre. La production de lingots d'acier et de grosses pièces n'est inférieure que de 8.7 p.c. à celle du premier trimestre de 1945; la fonte en gueuses décline de 5.6 p.c. En raison de l'arrêt de la production de munitions et de matériel de guerre, l'indice de l'emploiement dans les usines de marchandises durables diminue de 138.1 le 1er mars 1945 à 103.7 la date correspondante cette année. Le déclin de l'indice du total des bordereaux de paie hebdomadaires est de 182.3 à 128.7.

L'expansion de la distribution des denrées par l'intermédiaire des débouchés de détail persiste durant les premiers mois de l'année courante, même à la suite d'ajustements relatifs aux tendances saisonnières et aux prix de détail. L'indice de ventes passe de 212.6 en février à 229.3 en mars. Les prix de gros manifestent de même des augmentations progressives après les ajustements coutumiers.

La baisse du commerce extérieur par rapport à l'an dernier découle de la cessation d'expéditions à l'étranger de matériel de guerre. Les expéditions du Canada durant le premier trimestre cette année reflètent la transition de l'économie de guerre à une économie de paix partielle. Il se produit des changements intéressants, particulièrement pour ce qui a trait à l'augmentation prononcée des exportations à l'Amérique latine, un marché très prometteur pour les produits canadiens. Au cours du premier trimestre, les expéditions sont d'environ 2½ plus élevées que durant la même période de 1945. Les conséquences des expéditions de secours sont clairement visibles de même que la baisse qui suit la fin de la guerre. La distribution des exportations aux divers pays subit des changements remarquables, entre autres le déclin de 94.1 p.c. des expéditions à l'Italie et de 81 p.c. du volume des expéditions à l'Égypte. Les exportations à la France, à la Belgique, à la Hollande et à la Norvège augmentent brusquement en mars dernier. Le bien être économique du Canada dépendra considérablement de ce que la situation à l'étranger lui permettra de vendre des produits de ses usines et de ses fermes.

Les dépenses ordinaires du Dominion augmentent de \$25.9 millions en avril 1945 à \$45.4 millions cette année. La grande part de l'augmentation provient de paiements d'allocations familiales de \$19.9 millions le mois dernier. Il n'existait aucun déboursé de la sorte l'an dernier. Les dépenses de démobilisation et de convertissement diminuent de \$136.1 millions il y a un an à \$76.5 millions le mois dernier. Ces chiffres embrassent un don de \$10 millions par la Commission de l'Aide Mutuelle; il y n'y a pas de déboursé correspondant durant la dernière période. Les dépenses globales le mois dernier se chiffrent à \$122 millions contre \$162 millions l'an dernier.
